Cattle Market Steady to Lower; Large Supply

HOGS ABOUT 10c LOWER

Fat Lambs About Steady; High Price Hits \$11.00. Bulk Sells Upward From \$10.60—Some Under That. Muttons Fully Steady—Ewes Bring \$7.00—Feeders Uneven—Some Early Strong, Later Trade Rather Slow, Union Stock Yards, South Omaha, Nebr., September 12, 1916.—The week opened with the largest cattle run so far this year. A total of 540 loads or about 13,500 head, showed up. Monday's liberal supply included but a very few corn-fed steers, and it looked as if dressed beef men needed a few natives, and they paid about steady prices for the desirable offerings, although the trade was rather slow and uncertain on the short fed and grassy stuff that came in direct competition with the Western rangers. Some right good yearlings sold at \$10.25, and other sales looked steady with the close of last week. There were between forty and fifty loads of cows and heifers on Monday's market.

Quotations on cattle: Good to choice beefs, \$10.00@10.75; fair to good beefs, \$9.00@9.75; common to fair beefs, \$6.75@8.75; good to choice heifers, \$6.75@7.25; good to choice cows, \$6.50@7.00; fair to good cows, \$5.85@6.40; canners and cutters, \$4.50@5.75; veal calves, \$8.00@11.00; bo-logna bulls, \$5.25@5.85; beef bulls, \$6.00@7.00.

Receipts of hogs for Monday were larger than for any one day of last week, arrivals being estimated at seventy-one cars or 4,800 head. Owing to the limited shipping orders and a real heavy run of hogs at Chicago, another break was in order for Monday's hog market. What hogs order buyers bought they paid prices that were around 10c lower than last week. Packers also bought their hogs at prices that were at least a dime lower and in some cases 15c off. Bulk of the killer hogs brought \$10.25@10.40, while both shippers and packers paid as high as \$10.70 for a good kind of mixed hogs.

Sheep and lamb receipts got back to something like normal for Monday, arrivals counting out 122 cars or in the neighborhood of 33,000 head. A great deal of the offerings were of feeder class, and while killing stuff was fairly plentiful, packers who wanted lambs badly took hold readily, and most of the fat grades changed hands in the first couple of hours.

Quotations on sheep and lamb: Lambs, good to choice, \$10.75@11.00; lambs, fair to good, \$10.25@10.65; lambs, feeders, \$9.50@10.40; yearlings, good to choice, \$7.00@7.50; yearlings, fair to good, \$6.50@7.00; yearlings, feeders, \$6.50@8.00; wethers, fair to choice, \$6.25@7.25; ewes, good to choice, \$6.50@6.75; ewes, fair to good, \$6.00@6.50; ewes, plain to culls, \$4.00@5.75; ewes, feeding, \$5.00@6.25; ewes, breeders, all ages, \$6.25@9.00.

STATE FAIR PROVED TO BE GRAND AFFAIR

Marshal Wheeler Tells about Great Show at Lincoln—Grounds Well Policed, and the City, Too

A. B. Wheeler, city marshal of Alliance, who did special police service at the state fair, reports the fair this year the best ever held in the state. The departments were filled with exhibits that were declared by experts to be the best ever placed on exposition, at any fair in the United States, or elsewhere.

The police department had little trouble this year as there appeared to be but few crooks on the grounds or in the city of Lincoln. The management placed a ban on all fake schemes, and pickpockets and other light-fingered gentry seemed to think that the state fair was not a good field for their operations.

The number of automobiles parked on and near the grounds was something remarkable. In fact, there was hardly room for the large number of motor vehicles. The railroads felt the effect of the automobile transportation but in spite of the autos, the steam lines did a fine business, carrying many thousands to and from the fair.

TICKETS FOR THE FAIR
Box seats for the county fair and race meet will be placed on sale September 19. The first to come will be the first served and cash must be paid at the time of the reservation. Mail orders will be mailed in order of their receipt and the tickets will be mailed immediately.

The first three boxes, front and rear on both sides, will sell for \$10 each; the next five, \$7.50; and the balance at \$5. Each box accommodates six people. The same reservations will be in force at the night performances without additional cost. The tickets can be secured at the Commercial club office.

General admission for adults will be 50c for the afternoon performance and 25c at night. Children, 8 to 14 years, 25c and 15c. The grandstand is 25c in the afternoon and is free at night. The bleachers are 10c. Automobile, 50c, and vehicles, 25c.

Office supplies at The Herald office. Phone 340.

SORE SHOULDERS OF HORSES

Don't Let Animals Work Single Hour in Ill-Fitting Collars—Be Watchful in Spring.

(By GEORGE H. GLOVER, Colorado Agricultural College, Fort Collins, Colo.)

We know how annoying it is to be obliged to lay a horse off in the midst of spring's work, on account of sore shoulders or sore neck.

Do not forget that it is your own fault.

Some men always make sore shoulders, some never do. A good man is often seen in front of his horses, adjusting their collars and hames. Don't let a horse work an hour in an ill-fitting collar.

The greatest care is needed in the spring when work first starts, for the horse will shrink and the collar will soon be too large. A collar that is too large will injure the shoulders more than one that is too tight.

Imagine a man trying to play baseball before his hands have become toughened. A horse works with his shoulders. Keep them well. Look at them several times a day. Keep the shoulders and the collar clean. If a shoulder gets sore it is the driver's fault; hold him responsible.

"WARBLE" GRUBS IN SPRING

Presence of Insects Is Found in Tumors on Backs of Cattle—Plan for Removing.

(By G. W. HOWARD, Minnesota Station.)

Owners of cattle should be on the lookout for warbles on the backs of their animals this spring.

Evidence of the presence of these flies is found in tumors or warbles on the backs of cattle. In the spring or early summer from these warbles drop grubs which burrow into the ground and after about a month emerge as flies. These flies lay their eggs on the legs of cattle, the cattle lick the eggs off, and after a time the warbles appear on the backs of the cattle.

The grubs may be removed by pressure around the warbles, and then crushed; or they may be destroyed by the injection of grease or oil into the openings of the tumors.

In Europe from 20 to 40 drops of tincture of iodine is sometimes injected to kill the grubs.

PORTABLE RACK FOR FEEDING

So Simple in Construction That Bill of Material Is Not Necessary—It Is Easily Moved.

This rack is so simple of construction that we give no material bill for it. Besides, the length and width will depend upon your individual needs.

You can hitch a team to one end of this unique rack and easily move it.

Portable Feed Rack.

The runners are of 2 by 6s, the framework of 2 by 4s and the slats forming the "V" trough are 1 by 4s. The plan clearly shows how to make this feed rack.—Farmers Mail and Breeze.

BUSINESS OF THE BROOD SOW

Failure to Produce Good-Sized Litters and Nourish Them Often Due to Lack of Milk.

The business of the brood sow is to produce good-sized litters of healthy pigs and nourish them liberally until weaning time. In so far as she fails in this she fails in the purpose for which she is kept.

The farmer who keeps a half dozen or a dozen sows for breeding purposes finds half of them, perhaps, capable of fulfilling the maternal function well, while the other half do it only indifferently. Quite as often as not the difficulty is the lack of capacity to give milk enough for the litter, and the pigs are in a state of semi-starvation throughout the entire nursing period.

RIDDING PASTURES OF BURS

Pests Not Only Cause Annoyance to the Sheep Owner, but Decrease Price of Wool.

Nothing is so trying to the sheep owner as burs. Be as careful as he will, these pests will spring up, causing not only annoyance, but often loss. A fleece infected with matted burs always sells for less than clean wool. Thus, burs are a direct loss to every flock keeper.

The remedy? Only one—rid the pasture fields. That's another story, if there are many, but cultivated crops, a system of rotation, and constant use of the hoe will rid any farm of this serious weed pest.
